Acceleration with Zearn Math
Educators Grades K-5, 6-8

Session Objectives
In this session, participants will study:

- what acceleration looks like and identify examples in math resources,
- examples of on-ramps and support embedded in Digital Lessons, and
- how to put acceleration into action in a classroom setting.

Session Overview

Acceleration with Zearn Math

During this session, participants will:

- dive into math examples by grade band to learn what just-in-time foundational support looks like,
- practice strategies that support kids with catching up and moving forward with real math examples
- analyze both sample and real student data to consider when deeper support is needed, and
- make a plan to effectively implement these supports in a classroom setting.
