Acceleration with Zearn Math

Educators Grades K-5, 6-8

Advanced

Session Objectives

In this session, participants will study:

- ✓ What acceleration is and how it works within Zearn Math
- ✓ Examples of on-ramps and support embedded in Digital Lessons
- ✓ How to put acceleration into action in a classroom setting

Session Overview

Acceleration with Zearn Math   **90 MIN**

During this session, participants will:

- Learn how Zearn uses an acceleration approach
- Unpack math examples by grade band to learn what just-in-time foundational support looks like
- Explore models, visual representations, and strategies in Digital Lessons that support kids with catching up and moving forward
- Learn about additional tools teachers can access when students need foundational content to support their understanding of grade-level math

> **NOTE:** This 90-minute session is intended for educators familiar with Zearn and will build deeper connections between grade-level content in live and digital instruction.
