

Data Deep Dive

Educators Grades K-5, 6-8

Advanced

Session Objectives

In this session, participants will study:

- ✓ How to monitor usage data to drive continuous improvement in their classroom
- ✓ Methods for responding to implementation successes and challenges in their own data

Session Overview

Data Deep Dive

90 MIN

During this session, participants will:

- Review milestones and supports for successful implementation that drive real impact for kids
- Analyze their own Class Report data to identify which students are working toward impact and who might require more support
- Develop a plan to support students in completing 3+ grade-level Digital Lessons a week based on their data

NOTE: This 90-minute session is intended for educators looking to grow their impact based on their own Class Report data. Participants need at least four weeks of current data in their accounts to use for planning in this session.
