

# Express: Launch & Grow with Zearn Math

Educators Grades K-5, 6-8

## Advanced

### Session Objectives

In this session, participants will study:

- ✓ Zearn's approach to math learning that allows all kids to catch up and move forward in grade-level math
- ✓ Methods for monitoring and responding to student progress and productivity
- ✓ Strategies to increase student success in the Digital Lessons
- ✓ How to successfully implement Zearn Math to get to impact

### Session Overview

#### Express: Launch & Grow with Zearn Math

90 MIN

During this session, participants will:

- Learn new strategies for implementing Digital Lessons and supporting independent learning
- Analyze data from class level reports to understand student usage and identify areas of struggle
- Explore a case study to practice interpreting classroom data and choosing next steps for students
- Explore a framework to help diagnose the cause of student struggle and plan for possible responses
- Learn about additional resources teachers can use to provide deeper foundational content

**NOTE:** This fast-paced 90-minute session is intended for educators familiar with Zearn who are interested in a refresher on implementation.
