Foster Independent Learning
Educators Grades K-5, 6-8

Session Objectives
In this session, participants will study:
☑️ the classroom structures and habits that cultivate self-directed learners and perseverance with Zearn Digital Lessons,
☑️ how to monitor and support students’ independent digital learning, and
☑️ a range of strategies educators can use to support students when learning becomes unproductive.

Session Overview
Foster Independent Learning

During this session, participants will:
• see examples of how Zearn supports and fosters self-directed learners,
• consider how to increase independent learning with digital lessons in your classroom,
• learn strategies to teach students to persevere when they struggle in a digital lesson, and
• analyze a case study of a teacher to consider how to implement these strategies when using digital lessons within their classrooms.
