Lead Zearn Math: Part 2
District and School Leaders Grades K-5, 6-8

Session Objectives
In this session, participants will study:
- how to monitor usage data to drive continuous improvement and analyze impact,
- methods for responding to implementation successes and challenges, and
- how to increase access to grade-level content for all learners on Zearn Math

During the first part of the session, participants will:
- review milestones and supports for successful implementation,
- analyze their own school or district data to identify successes and barriers,
- learn about actions leaders can take to support effective implementation,
- engage in a problem of practice protocol to build on strengths and plan supports to maximize student learning, and
- develop a plan to bring back to their school or district based on data

During the second part of the session, participants will:
- deeply explore one of the following topics to support all learners, predetermined by their school or district:
  - Acceleration with Zearn Math
  - Foster Independence
  - Tailored Support for Multilingual Learners
  - Tailored Support for Students with Disabilities
  - Support with Student Struggle

This session will include a break for participants.

NOTE: This session is available beginning 9/11/23. Participants need at least four weeks of current data in their accounts to use for planning in this session.
