

Tailored Support for Students with Disabilities

Educators Grades K-5, 6-8

Advanced

Session Objectives

In this session, participants will study:

- ✓ How students with disabilities are supported in Zearn's Digital Lessons
- ✓ Actions teachers can take to create conditions for success in math classrooms for students with disabilities accessing Digital Lessons
- ✓ Strategies that address individual needs and maximize learning

Session Overview

Tailored Support for Students with Disabilities

90 MIN

During this session, participants will:

- Learn how students with different learning disability profiles are supported in Zearn's Digital Lessons
- Discuss how to implement instructional accommodations commonly assigned to students with disabilities
- Engage with scenarios to practice identifying student struggle, gathering information from student dialogue, and creating support plans for individual students

NOTE: This 90-minute session is intended for educators familiar with Zearn.
