Tailored Support for Specialized Populations
Educators Grades K-5, 6-8

Session Objectives
In this session, participants will study:
✓ the features built into Digital Lessons designed to support various students' learning needs,
✓ instructional accommodations to support individual needs, and
✓ strategies that address individual needs and maximize learning.

Session Overview
Tailored Support for Specialized Populations

During this session, participants will:
• watch a series of videos identifying the support features in a Digital Lesson and what they are designed to do,
• determine how to implement these supports with special populations to maximize student learning, and
• use sample student profiles to practice using reports and observational data to choose supports for individual students.
