

# Grow with Zearn Data

Educators Grades K-5, 6-8

## Foundations

### Session Objectives

In this session, participants will study:

- ✓ How to interpret classroom and individual student data on the platform
- ✓ Milestones that give clear guidance for successful implementation
- ✓ Strategies for responding to student progress and productivity on Digital Lessons

## Session Overview

### Grow with Zearn Data

90 MIN

During this session, participants will:

- Analyze data from class level reports to understand student usage and identify areas of struggle
- Hear firsthand how teachers monitor reports to understand and celebrate students' progress
- Explore a framework to help diagnose the cause of student struggle and plan for possible responses
- Learn about additional resources teachers can use to provide deeper foundational support
- Apply and extend session learnings with a series of scenarios to practice interpreting classroom data and choosing next steps for students

**NOTE:** This 90-minute session is intended for educators who have an understanding of Zearn's approach and materials and have ideally engaged in Launch Zearn Math.
