Grow with Zearn Data

Educators Grades K-5, 6-8

Session Objectives

In this session, participants will study:
✔️ how to interpret Zearn Math data,
✔️ milestones that give clear guidance for a successful implementation, and
✔️ methods for responding to student progress and productivity on Digital Lessons.

Session Overview

Grow with Zearn Data

During this session, participants will:
• analyze data from Zearn Class Reports to understand student productivity and identify areas of struggle,
• learn strategies to support and celebrate students based on their math learning,
• use scenarios to evaluate when class or individual strategies may be most beneficial,
• explore a case study to practice interpreting classroom data and choosing next steps, and
• get an orientation to the purpose of foundational lessons and the bookmarking feature and determine when to use each.
