

Grow with Zearn Data for Leaders

District and School Leaders Grades K-5, 6-8

Foundations

Session Objectives

In this session, participants will study:

- ✓ How to monitor usage data to analyze impact and drive continuous improvement in their school or district
- ✓ Methods for responding to implementation successes and challenges in their own data
- ✓ Strategies teachers can use when students are not yet completing 3+ grade-level Digital Lessons

Session Overview

Grow with Zearn Data for Leaders

3 HOURS

During this session, participants will:

- Review milestones and supports for successful implementation that drive impact for all kids
- Analyze their own school or district data to identify which classrooms and schools are working toward impact or might require more support
- Learn about actions leaders around the country have taken to support effective implementation
- Explore a case study based on district or school needs to determine potential barriers in reaching implementation milestones
- Collaborate with colleagues to build on strengths and plan supports to maximize student learning
- Explore a framework to help diagnose the cause of student struggle, plan for possible responses and consider how to use this guidance to support teachers
- Orient to foundational lessons and the bookmarking feature and know when to use each
- Develop a plan to implement in their school or district based on data

★ This session will include a break for participants.

NOTE: This 3-hour session is for district & school leaders looking to analyze their own data. Participants ideally engaged in Launch Zearn Math for Leaders and need access to at least 4 weeks of current data.
