

Launch Zearn Math

Educators Grades K-5, 6-8

Foundations

Session Objectives

In this session, participants will study:

- ✓ Zearn's approach to math learning that allows all kids to catch up and move forward in grade-level math
- ✓ The components of a Digital Lesson and resources that support instruction
- ✓ How to navigate the resources and reports available on the platform
- ✓ How to successfully implement Zearn Math to get to impact

Session Overview

Launch Zearn Math

90 MIN

During this session, participants will:

- Engage in an overview of Zearn's approach
- Walk through a Digital Lesson to experience the balance of fluency, guided practice, and independent practice
- Understand the built-in features and multiple layers of scaffolded support for all learners right when they need it
- Hear firsthand how teachers plan for their first weeks with Zearn to support students in early implementation
- Learn usage recommendations that drive impact for all students
- Get an overview of essential reports available on Zearn and how they can be used to monitor students' digital learning
- Determine structures and routines to set students up to learn independently

NOTE: This 90-minute session is intended for educators new to Zearn and is the first in a series of two foundational trainings.
