

# Launch Zearn Math for Leaders

District and School Leaders Grades K-5, 6-8

## Foundations

### Session Objectives

In this session, participants will study:

- ✓ Zearn's approach to math learning that allows all kids to catch up and move forward in grade-level math
- ✓ The components of a Digital Lesson and resources that support implementation
- ✓ Milestones that lead to successful implementation and transformative results
- ✓ How to monitor usage data to drive continuous impact

## Session Overview

### Launch Zearn Math

3 HOURS

During this session, participants will:

- Engage in a variety of math problems to understand Zearn's approach to addressing unfinished learning in the context of new on-grade level learning
- Walk through a Digital Lesson to experience the balance of fluency, guided practice, and independent practice
- Understand the built-in features and multiple layers of scaffolded support for all learners right when they need it
- Learn the phases of implementation and hear actions leaders around the country can take early in the year that lead to impact
- Identify key metrics to support early implementation and learn how to monitor data in school and class level reports
- Explore a case study to practice using data and determine which classrooms should be celebrated and which may need more support

★ This session will include a break for participants.

**NOTE:** This 3-hour session is intended for district and school leaders and is the first in a series of two foundational trainings.
