Lead Zearn Math: Part 1
District and School Leaders Grades K-5, 6-8

Session Objectives
In this session, participants will study:
- Zearn's approach to math learning,
- the components of a Digital Lesson and other supporting resources,
- milestones that lead the way to successful implementation, and
- how to monitor usage data to drive continuous improvement.

Session Overview

During this component, participants will:
- engage in an overview of Zearn's approach,
- walk through a Digital Lesson to understand the components and embedded support, and
- explore the features of a Digital Lesson that help all kids access grade level content and reflect on how to help teachers understand these supports.

During this component, participants will:
- explore precise actions for early implementation,
- learn how Zearn's Admin Reports support with implementation and what to look for early in the year, and
- plan for their launch of Zearn Math.

🌟 This session will include a break for participants.
