

Grow with Zearn Math Data for Leaders

District and School Leaders Grades K-5, 6-8

Session Objectives

In this session, participants will:

-  learn how to monitor usage data to analyze impact and drive continuous improvement in their school or district
-  study methods for responding to implementation successes and challenges in their own data

NOTE: This **90-minute** session is for district & school leaders looking to analyze their own data. Participants ideally engaged in “Launch Zearn Math for Leaders” and need access to at least four weeks of current data.

Session Overview

Grow with Zearn Math Data (90 minutes)

During this session, participants will:

- review milestones and supports for successful implementation that drive impact for all kids
- analyze their own school or district data to identify which classrooms and schools are working toward impact or might require more support
- learn about actions leaders around the country have taken to support effective implementation
- explore a case study based on district or school needs to determine potential barriers in reaching implementation milestones
