

Launch Zearn Math

Educators Grades K-5, 6-8

Session Objectives

In this session, participants will:

-  learn how Zearn Math enables all students to engage with grade-level math with built-in support to catch up and move forward
-  understand how Zearn Math works as a companion to their curriculum, in order to assign content that is instructionally meaningful
-  monitor students' progress toward completing 3 grade-level digital lessons each week and provide in-the-moment support when needed
-  establish consistent Zearn Math routines within the first few weeks of school that set students up for consistent, structured Zearn use

NOTE: This **90-minute** session is intended for educators new to Zearn and is the first in a series of two foundational trainings.

Session Overview

Launch Zearn Math (90 minutes)

During this session, participants will:

- explore how Zearn Math's design supports student learning
- walk through a digital lesson to experience the balance of fluency, guided practice, and independent practice
- experience Zearn Math's built-in features and multiple layers of scaffolded support for all learners right when they need it
- learn usage recommendations that drive impact for all students
- discover the data routines teachers use to monitor implementation and support students, using the reports that are built for those routines
- hear how teachers plan for their first days with Zearn Math to support students in early implementation
