

Digital Lesson Components

Zearn digital math lessons offer a consistent structure of learning activities, designed to accelerate learning by integrating unfinished learning into the context of new learning.

Fluency practice	Number Gym is a fluency experience that helps students build foundational number sense. After Number Gym, students complete Lesson-Aligned Fluencies that develop procedural fluency and prepare students for new content.
Learn new math	After fluency practice, students learn new concepts during Guided Practice activities. Each activity explores new concepts with real on-screen teachers, interactive digital manipulatives, and pause points where students stop and do math. Throughout each activity, students are prompted to complete guided paper-and-pencil Student Notes .
Show what you know	Students demonstrate their understanding of the lesson in Zearn's Tower of Power , an embedded daily diagnostic that assesses understanding and automatically launches just-in-time support when students need it. After students complete a Tower of Power, they earn a digital Badge and automatically progress to the next lesson.
