

Summer is the perfect time to keep building and deepening math understanding! Our classroom has been using Zearn Math this year, and this summer your student can continue learning with Zearn Math's interactive Digital Lessons while school is out. Zearn Math's Digital Lessons are free to use since Zearn is a nonprofit that offers its curriculum at no charge to students and families.

To access Zearn Math over the summer, your student will need a computer or iPad with an internet connection, headphones, and paper Student Notes (which can be printed from each Digital Lesson). Below are your student's login credentials, along with a summer learning goal for them to focus on, so they can be ready for next school year. To access Zearn Math, visit [www.zearn.org](http://www.zearn.org) and have your student enter the username and password below.

### Your Student's Login Information

Student Name: \_\_\_\_\_

Username: \_\_\_\_\_

Password: \_\_\_\_\_

Summer learning goal: \_\_\_\_\_
