

Helping All Students Access Grade-Level Math: Using Zearn with enVision Mathematics South Carolina K-8

Zearn is a digital learning platform designed to support all students in building deep, lasting, understanding of grade-level math. It's not a repeat of your curriculum—it's a powerful companion that complements your instruction through a coherent, research-backed learning progression. This guide shows how Zearn works alongside enVision Math South Carolina to help every student succeed.

About Zearn: A Daily, Coherent Companion to Your Core Math Curriculum

Zearn is designed to work alongside your core math curriculum every day — reinforcing key ideas through a research-grounded learning progression. Zearn's digital lessons complement and strengthen what you're already teaching, giving every student more opportunities to explore, persevere, and break through in grade-level math.

When learning with Zearn, students:

- Develop both procedural fluency and conceptual understanding, strengthening automaticity with math facts while deepening their grasp of key mathematical ideas.
- Engage with math through a Concrete–Representational–Abstract (CRA) progression, moving from objects and visual models to symbols and equations.
- Receive just-in-time, embedded support that helps them work through challenges while maintaining grade-level rigor.

Key Steps to Effective Zearn Usage

Within each grade, Zearn's digital content is organized into units — called Missions. Each Zearn Mission focuses on a related set of related grade-level math ideas, with lessons intentionally sequenced to build and deepen understanding. Students get the most out of Zearn when their Mission is connected to the concepts they are currently studying in class.

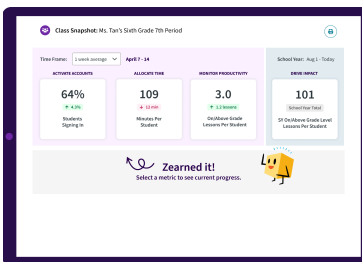

To use Zearn effectively, assign the Mission identified in this guide for your current unit and let students progress through the Mission lesson by lesson, in order, at their own pace. The goal is for students to complete at least three grade-level lessons per week, or 90 over the course of the year. The steps below outline how to put this into practice.

1. At the start of a new unit, assign students to the first lesson of the recommended Mission and let them progress at their own pace — no daily reassignment needed.

2. Set a goal for students to complete three grade-level lessons each week. Protect about 90 minutes of weekly instructional time to make this achievable.

3. Monitor progress during Zearn time and across the week using real-time reports. Use the data to identify students on track to complete three grade-level lessons per week and those who may need additional support.

4. Support and celebrate students by recognizing progress toward weekly goals and providing additional support to help every student continue moving forward.

Kindergarten Learning progression

This table shows the recommended Zearn Mission for each enVision Math South Carolina Topic. Refer to it each time you begin a new Topic to determine which Mission to assign.

Assign students to the first lesson of the recommended Mission and allow them to progress at their own pace. Because assignments are made at the Mission level, all students stay focused on the same grade-level concepts, even as they move through lessons at different speeds. When your class begins a new Topic assign the next recommended Mission to all students, even if some have not finished their current Mission. Each Mission includes built-in supports that give every student access to new content while staying connected to grade-level learning.

enVision Math South Carolina	Zearn Math Supporting Digital Content
Topic 1: Numbers 0 to 5 (10 lessons)	Mission 1: Numbers to 10 (30 lessons)
Topic 2: Compare Numbers 0 to 5 (5 lessons)	<i>Note: When you begin teaching enVision Topic 2, students should continue working through Zearn Mission 1.</i>
Topic 3: Numbers 6 to 10 (8 lessons)	<i>Note: When you begin teaching enVision Topic 3, students should continue working through Zearn Mission 1.</i>
Topic 4: Compare Numbers 0 to 10 (5 lessons)	Mission 2: Two-Dimensional and Three-Dimensional Shapes (8 lessons)
Topic 5: Classify and Count Data (6 lessons)	<i>Note: When you begin teaching enVision Topic 5, students should continue working through Zearn Mission 2.</i>
Topic 6: Understand Addition (8 lessons)	Mission 3: Comparison of Length, Weight, Capacity, and Numbers to 10 (25 lessons)
Topic 7: Understand Subtraction (7 lessons)	<i>Note: When you begin teaching enVision Topic 7, students should continue working through Zearn Mission 3.</i>
Topic 8: More Addition and Subtraction (10 lessons)	Mission 4: Number Pairs, Addition and Subtraction to 10 (33 lessons)

enVision Math South Carolina	Zearn Math Supporting Digital Content
Topic 9: Count Numbers to 20 (7 lessons)	<i>Note: When you begin teaching enVision Topic 9, students should continue working through Zearn Mission 4.</i>
Topic 10: Compose and Decompose Numbers 11 to 19 (7 lessons)	<i>Note: When you begin teaching enVision Topic 10, students should continue working through Zearn Mission 4.</i>
Topic 11: Count Numbers to 100 (6 lessons)	Mission 5: Numbers 10-20 and Counting to 100 (19 lessons)
Topic 12: Identify and Describe Shapes (8 lessons)	<i>Note: When you begin teaching enVision Topic 12, students should continue working through Zearn Mission 5.</i>
Topic 13: Analyze, Compare, and Create Shapes (7 lessons)	<i>Note: When you begin teaching enVision Topic 13, students should continue working through Zearn Mission 5.</i>
Topic 14: Describe and Compare Measurable Attributes (6 lessons)	Mission 6: Analyzing, Comparing, and Composing Shapes (6 lessons)

Grade 1 Learning progression

This table shows the recommended Zearn Mission for each enVision Math South Carolina Topic. Refer to it each time you begin a new Topic to determine which Mission to assign.

Assign students to the first lesson of the recommended Mission and allow them to progress at their own pace. Because assignments are made at the Mission level, all students stay focused on the same grade-level concepts, even as they move through lessons at different speeds. When your class begins a new Topic assign the next recommended Mission to all students, even if some have not finished their current Mission. Each Mission includes built-in supports that give every student access to new content while staying connected to grade-level learning.

enVision Math South Carolina	Zearn Math Supporting Digital Content
Topic 1: Understand Addition and Subtraction (9 lessons)	Mission 1: Add and Subtract Small Numbers (32 lessons)
Topic 2: Fluently Add and Subtract Within 10 (9 lessons)	<i>Note: When you begin teaching enVision Topic 2, students should continue working through Zearn Mission 1.</i>
Topic 3: Addition Facts to 20: Use Strategies (9 lessons)	<i>Note: When you begin teaching enVision Topic 3, students should continue working through Zearn Mission 1.</i>
Topic 4: Subtraction Facts to 20: Use Strategies (9 lessons)	<i>Note: When you begin teaching enVision Topic 4, students should continue working through Zearn Mission 1.</i>
Topic 5: Work with Addition and Subtraction Equations (7 lessons)	Mission 2: Meet Place Value (23 lessons)
Topic 6: Represent and Interpret Data (7 lessons)	<i>Note: When you begin teaching enVision Topic 6, students should continue working through Zearn Mission 2.</i>
Topic 7: Extend the Counting Sequence (7 lessons)	<i>Note: When you begin teaching enVision Topic 7, students should continue working through Zearn Mission 2.</i>
Topic 8: Understand Place Value (7 lessons)	Mission 4: Add and Subtract Big Numbers (23 lessons)

enVision Math South Carolina	Zearn Math Supporting Digital Content
Topic 9: Compare Two-Digit Numbers (6 lessons)	<i>Note: When you begin teaching enVision Topic 9, students should continue working through Zearn Mission 4.</i>
Topic 10: Use Models and Strategies to Add Tens and Ones (9 lessons)	Mission 6: Add and Subtract to 100 (18 lessons)
Topic 11: Use Models and Strategies to Subtract Tens (7 lessons)	<i>Note: When you begin teaching enVision Topic 11, students should continue working through Zearn Mission 6.</i>
Topic 12: Measure Lengths (4 lessons)	Mission 3: Measure Length (10 lessons)
Topic 13: Time and Money (7 lessons)	<i>Note: When you begin teaching enVision Topic 13, students should continue working through Zearn Mission 3.</i>
Topic 14: Reason with Shapes and Their Attributes (9 lessons)	Mission 5: Work with Shapes (13 lessons)
Topic 15: Equal Shares of Circles and Rectangles (4 lessons)	<i>Note: When you begin teaching enVision Topic 15, students should continue working through Zearn Mission 5.</i>

Grade 2 Learning progression

This table shows the recommended Zearn Mission for each enVision Math South Carolina Topic. Refer to it each time you begin a new Topic to determine which Mission to assign.

Assign students to the first lesson of the recommended Mission and allow them to progress at their own pace. Because assignments are made at the Mission level, all students stay focused on the same grade-level concepts, even as they move through lessons at different speeds. When your class begins a new Topic assign the next recommended Mission to all students, even if some have not finished their current Mission. Each Mission includes built-in supports that give every student access to new content while staying connected to grade-level learning.
