MORE OPPORTUNITIES FOR EVERY STUDENT TO LEARN MATH
Students learn the same concepts digitally as they do with their teacher, creating multiple opportunities to engage with each lesson and build deep understanding.

SUPPORTS TEACHERS WITH DAILY DIFFERENTIATED INSTRUCTION
Designed by teachers to include the materials, data, and knowledge to plan and deliver daily, differentiated instruction that supports all learners.

ENGAGING, CHALLENGING, AND SUPPORTIVE FOR ALL STUDENTS
A learning experience where every student receives the exact support they need and believes in their capacity to grow as learners.

Sample Our Curriculum

IN THIS GUIDE YOU WILL FIND:

- An orientation to Grade 5 curricular materials, from grade-level planning materials to lesson-level activities
- Teacher Materials for the first lesson of Grade 5, with links to access content
- Student Materials for the first lesson of Grade 5, with links to access content
- Step-by-step instructions on how to access all materials using a Zearn Math account

ZEARN MATH TIP

The materials referenced in this document reflect one daily lesson within Grade 5. Shortcut weblinks are included to access all Lesson 1 materials. Every lesson in Grade 5 can be accessed with a Zearn account.
Teacher Materials

OVERVIEW MATERIALS
Zearn Math offers grade- and unit-level overview materials that support teachers with planning and delivering differentiated instruction that meets the needs of all learners. These materials include pacing guidance, detail on the standards covered, summaries of the major work of the grade, and the learning objectives of each unit (which Zearn Math calls Missions). Zearn Math also provides comprehensive professional development designed to support grade-level teams in preparing for teaching each upcoming unit and planning daily instruction.

LESSON MATERIALS
Zearn Math provides comprehensive materials that build deep understanding of concepts and flexible problem solving skills through an emphasis on visualization, drawing to solve, and concrete representations of abstract concepts. Curricular materials can be used across a mix of instructional formats, including both small group and whole group learning. Class Reports provide visibility into student productivity and misconception data to inform instruction and support.

Student Materials

LESSON MATERIALS
Students learn the same concepts digitally as they do with their teacher, creating multiple opportunities to engage with each lesson and build deep understanding. During Independent Digital Lessons, students learn and practice new concepts at their own pace with digital manipulatives, interactive videos, paper-and-pencil transfer, and precise digital feedback at the moment of misconception. Each Independent Digital Lesson consists of an adaptive fluency, a lesson-aligned fluency, guided practice, and independent practice.

ASSESSMENTS
Zearn Math offers formative, Mission-level assessments that consist of open response items that require students to show their work or explain their thinking in a variety of ways.
Introduction to Grade 5

136 Lessons

Grade 5 mathematics is about: (1) Developing fluency with addition and subtraction of fractions, and developing understanding of the multiplication of fractions and of division of fractions in limited cases (unit fractions divided by whole numbers and whole numbers divided by unit fractions), (2) extending division to two-digit divisors, integrating decimal fractions into the place value system and developing understanding of operations with decimals to hundredths, and (3) developing fluency with whole number and decimal operations, and developing understanding of volume.

Each grade of Zearn Math consists of Missions (Zearn Math nomenclature for units), Topics, and Lessons.

Mission 1: Place Value with Decimal Fractions

In Mission 1, students' understandings of the patterns in the base ten system are extended from Grade 4’s work with place value to include decimals to the thousandths place. In Grade 5, students deepen their knowledge through a more generalized understanding of the relationships between and among adjacent places on the place value chart (e.g., 1 tenth times any digit on the place value chart moves the digit one place value to the right). Toward the Mission’s end, students apply these new understandings as they reason about and perform decimal operations through the hundredths place.

Multiplicative Patterns on the Place Value Chart

Each Zearn Math Mission is broken down into topics. A topic is a group of lessons that teach the same concept. Grade 5, Mission 1, Topic A opens the Mission with a conceptual exploration of the multiplicative patterns of the base ten system using place value disks and a place value chart.

In this lesson, students review how to conceptually understand the relationship between adjacent base ten units. This is important for future lessons, when they extend their place value understanding to decimals and perform decimal operations.

Overview Materials

GRADE 5 OVERVIEW

Zearn Math Grade Overviews include pacing guidance, detail on the standards covered, and identification of the mathematical practices relevant to the Missions of the grade. Each Grade Overview also provides summaries of the major work of the grade and the learning objectives of each Mission. Grade Overviews are accessible through educator Zearn accounts.

Review Grade 5 Overview

GRADE 5 MISSION 1 OVERVIEW

Zearn Math Mission Overviews provide instructional information at a topic level, grouping lessons that teach the same concept. The overview includes a listing of lessons within the Mission (including optional lessons) and a listing of new and recently introduced terms.

Review G5M1 Mission Overview
CURRICULUM STUDY PROFESSIONAL DEVELOPMENT (PD)

The purpose of Curriculum Study is to deepen understanding of each unit of the Zearn curriculum. Participants will collaboratively examine curricular materials, solving math problems using strategies from the mission, and analyze example student work.

Lesson Materials

**WHOLE GROUP FLUENCY**

During the daily Whole Group Warm-Up, students have opportunities for fluency and application practice and are able to activate prior learnings in preparation for upcoming work. The whole group activities for this Grade 5 Mission open the Mission with a conceptual exploration of the multiplicative patterns of the base ten system using place value disks and a place value chart.

In Lesson 1, students rename the units with a choral fluency that reviews place value foundations. The emphasis on unit language not only strengthens student place value understanding, but it also builds important parallels between whole number and decimal fraction understanding.

*This document includes all Whole Group Fluencies for the Mission.*

**WHOLE GROUP WORD PROBLEMS**

Students share their own thinking aloud and discuss classmates’ problem-solving strategies throughout daily whole-group problem solving. During this time, teachers facilitate thoughtful mathematical discussions between students that allow learners to refer to and build on each other’s ideas. As students share their reasoning, they are exposed to other perspectives, and engage in mathematical sense-making, they are able to deepen their own understanding and become more creative and effective problem solvers.

In Lesson 1, students are presented with a word problem intended to activate prior knowledge from Grade 4 and offer a successful start to Grade 5. Some students may use area models to solve, some may use the standard algorithm, and still others may draw tape diagrams to show their thinking.

*This document includes all Whole Group Word Problems for the Mission.*
SMALL GROUP LESSON

Each Small Group Lesson is designed to support teachers in planning and delivering instruction that helps students build deep understanding of new concepts. During each Small Group Lesson, students model math with concrete manipulatives, represent their work on paper, discuss their reasoning aloud, and receive direct feedback from their teacher and classmates. This provides all learners with the opportunity to construct physical models of abstract mathematical ideas and test and confirm their thinking.

Throughout the materials, teachers are supported with guiding questions they can use as opportunities to give feedback, debrief questions to summarize the lesson, and important guidance on how to adjust the lesson to meet the needs of all learners. Each lesson also provides concrete materials to use to help students model math.

This Grade 5 lesson starts by dividing single units by ten to build the place value chart to introduce thousandths, and each problem guides students to articulate changes in value and shifts in position while showing it on the place value chart and noting the corresponding multiplication and division sentences.

This document includes all Small Group Lessons for the Mission.

ZEARN MATH TIP

When students log in, they are directed to their personal Student Feed, where they see the current activity in their assigned Independent Digital Lesson. Students can only access the next digital activity in the sequence once they complete their currently assigned activity.

ADAPTIVE FLUENCY

Every Independent Digital Lesson begins with an individually adaptive fluency activity designed to bridge K–2 math foundations, reinforce previously learned skills, and address areas of unfinished learning.

Types of activities include: Addition Magician, Next Stop Top, Hop Skip Splash!, Count the Cosmos, and Number Gym

Try Adaptive Fluency ➔

LESSON ALIGNED FLUENCY

Each Independent Digital Lesson includes a fluency activity aligned to the specific lesson the student is working on. These activities support ongoing grade-level learning by developing students’ procedural fluency and preparing them for upcoming content. All software-based fluency work complements teacher-led whole-group fluencies, and the combination strengthens students’ math understanding and learning retention.

This Grade 5 Sprint reviews whole-number place-value patterns by prompting students to work through multiplication by factors of ten, preparing students for the upcoming Mission.

Types of activities include: Sprint, Multiply Mania, Pair Compare, and Discovery Canyon

Try Lesson Aligned Fluency ➔
GUIDED PRACTICE

Students learn new concepts and extend their understanding during the guided practice portion of Independent Digital Lessons. Each guided practice activity creates a rich learning environment for students through interactive and multi-sensory videos featuring real on-screen teachers, digital manipulatives, and paper-and-pencil Student Notes.

Guided practice activities are aligned to the small group lesson and reinforce the objectives of the lesson. For this lesson, students divide units by ten to build out the place value chart from one thousand to one thousandth. Students continue by then multiplying by ten and working with decimals using interactive place value disks, deepening understanding of the relationship between and among adjacent places on the place value chart.

*Types of guided practice include: Math Chat, Story Time, Z-Squad, and Learning Lab*

**Try Guided Practice ➔**

STUDENT NOTES

During the guided practice portion of Independent Digital Lessons, students are prompted to complete problems in their paper Student Notes to transfer their software-based learning and strengthen knowledge retention. After solving an un-scaffolded problem in their notes, students are also prompted to check and correct their work.

**Review Student Notes ➔**

Our workbooks and answer keys put all critical paper materials, including student notes, needed for daily teaching and learning in one, easy-to-use place.

**Review Student Workbook ➔**

ZEARN MATH TIP

Embedded support in Independent Digital Lessons precisely address misconceptions in real time and give all students opportunities to visualize problems in multiple ways and try again. As you explore the digital lessons, make sure to get a few answers incorrect to experience the embedded remediation and precise feedback.
INDEPENDENT PRACTICE

The Tower of Power, the independent practice portion of an Independent Digital Lesson, is a scaffolded assessment, administered automatically at the end of each Independent Digital Lesson. The Tower of Power is focused on the content of a single lesson and allows students to demonstrate their new understanding. If students make a mistake, they receive real-time remediation at the point of misconception, allowing them to correct their understanding and continue through the assessment. If students continue to struggle in the Tower of Power after multiple remediation paths, their teacher receives an alert in the Tower Alerts Report, enabling them to provide differentiated support for that student. All students have a rich learning experience throughout the assessment as they engage with the digital manipulatives and interactive visuals that are part of the Zearn Math software-based student experience.

In this independent practice, students demonstrate understanding of the relationship between tenths, hundreds, and thousandths using a digital place value chart. Students work through multiple stages, solving problems that prompt students to divide and multiply by factors of ten. Each stage becomes less scaffolded as students demonstrate understanding.

Try Independent Practice →

ZEARN MATH TIP

After students complete a Tower of Power, they earn a badge to mark their hard work and progress. Students then automatically progress to the next lesson in the curriculum and are assigned to the appropriate Number Gym activity.

EXIT TICKET

After finishing the Tower of Power, students must also complete a paper-and-pencil Exit Ticket as the last step of an Independent Digital Lesson. Exit Tickets are un-scaffolded practice problems that allow students to transfer their learning to paper and demonstrate their understanding of the content of the lesson. Teachers can use Exit Tickets as formative assessments to identify students who may need extra help with a particular concept and provide appropriate support. Exit Tickets are included in Zearn Student Workbooks.

Review Exit Ticket (See Page 9) →
BONUS

Digital Bonuses are challenging problems students can work on after they complete an Independent Digital Lesson. Teachers can assign students to work on bonuses during weekly flex time to enrich and extend learning.

Try Bonus →

ZEARN MATH TIP

As students work through Independent Digital Lessons, Zearn Math Class Reports provide teachers with real-time data and insights into student pace, progress, and areas of struggle during software-based learning. Class Reports are available to all teachers through their Teacher Accounts.

OPTIONAL HOMEWORK

If teachers choose to assign homework, printable paper homework aligned to each Mission is available.

OPTIONAL PROBLEM SET

Problem Sets are optional practice because the Problem Set is translated into the Tower of Power, which is the independent practice experience in the Independent Digital Lessons. Parts of the Problem Sets could be used as practice if students need it.

Grade 5 Additional Student Materials

ASSESSMENTS

Mid-Mission and End-of-Mission assessments are formative assessments administered roughly halfway through the Mission and at the conclusion of the Mission respectively. These paper assessments consist of open response items that require students to show their work or explain their thinking in a variety of ways, including drawing models and writing explanations. The assessment items vary in their focus, ranging from items that highlight a student's understanding of a big mathematical idea to items that are more focused on students’ procedural fluency. Assessments are available as part of a Zearn School Account.
