

Navigating the Class Snapshot Report

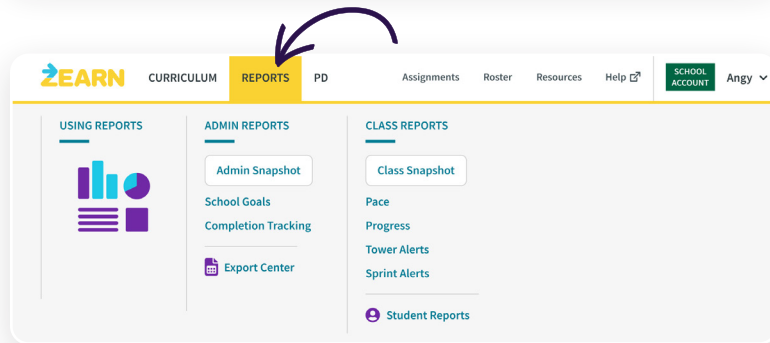

Use the Class Snapshot Report to review important data supporting your Zearn implementation.

1

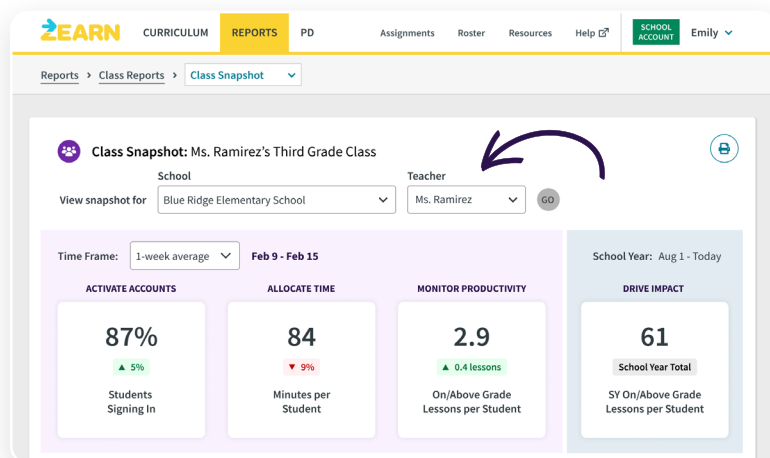

Log in at zearn.org.

Zearn's platform offers integration with **Clever** and **Classlink** for easy sign on.

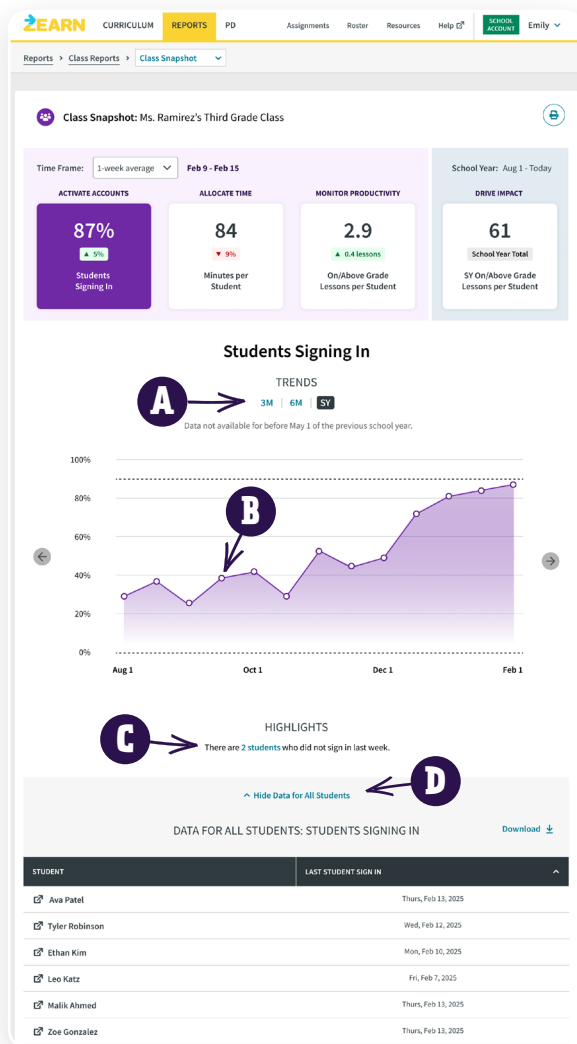

2

Click on the **Reports** tab and select **Class Snapshot** to view the **Class Snapshot** Report.

3

From the **Class Snapshot** landing page, choose a class to view data on sign-ins, time, and lesson completion. Then, select a metric to dive deeper, to see trends over time, to see student highlights for highest and lowest performance, and to access the full set of data for each category.

4

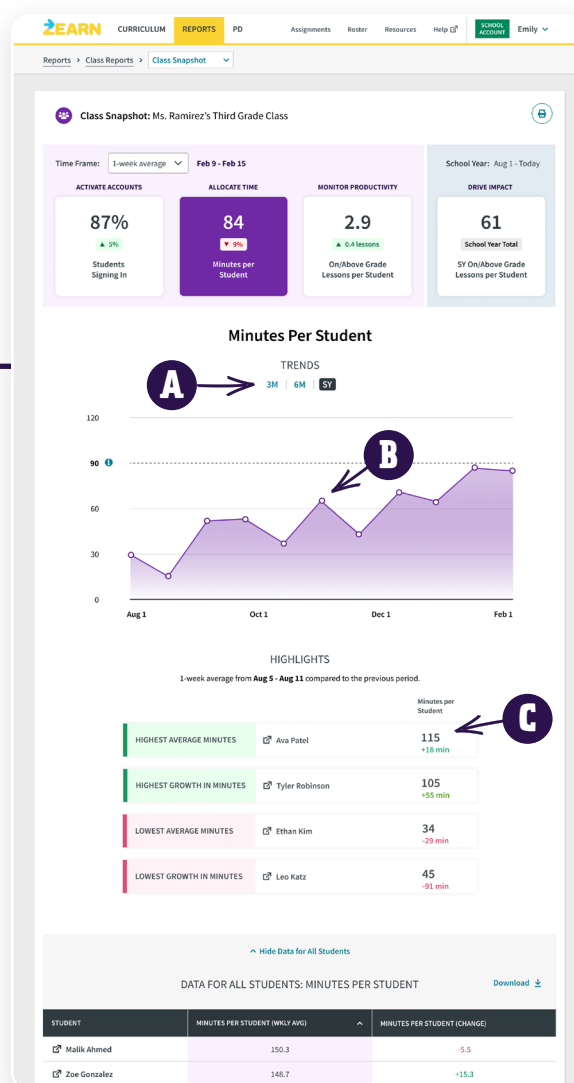

Click on **Students Signing In** to monitor progress on signing in.

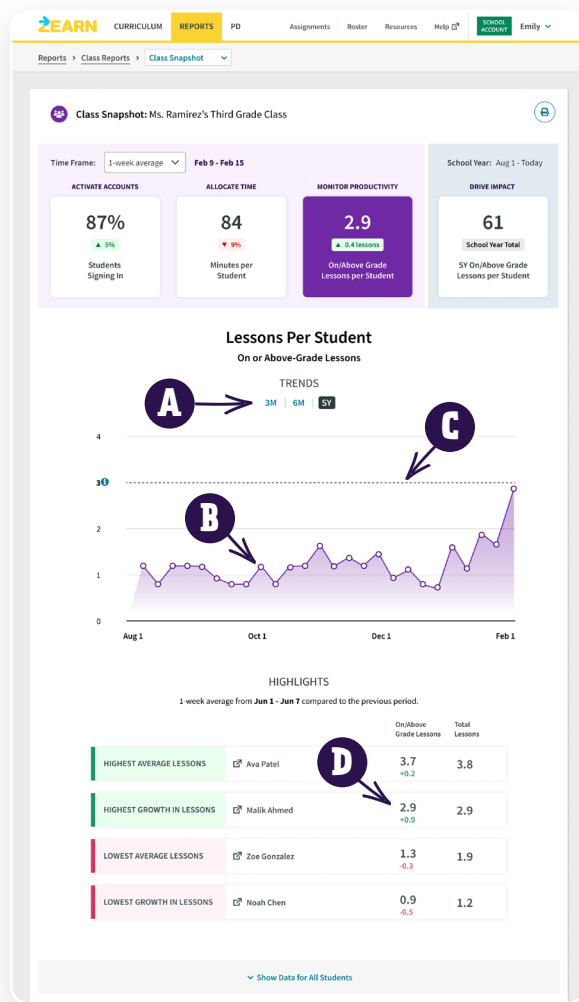

- A Review the percent of student sign-ins over time in a **3 month**, **6 month**, or **school year view**.
- B Click on a data point to see the number of students signing in and rostered in a given week.
- C Click on students under **Highlights** to see students who did not sign in last week.
- D Expand the data to **show all students**.

5

Click on the metric **Minutes Per Student** to monitor time spent on Zearn.

- A Review average minutes per student in a **3 month**, **6 month**, or **school year view**.
- B Compare minutes achieved to the recommended goal of **90 minutes per week**.
- C Review students with the highest average minutes, largest increase, lowest average minutes, and largest decrease in the selected time period.

6

Select **Monitor Productivity** to monitor progress on completing grade-level lessons.

- A Review lessons per student in a **3 month**, **6 month**, or **school year view**.
- B Click on a data point to review the percent of students who completed 3+ on/above grade digital lessons.
- C Compare average lessons per student to the recommended goal of 3+ grade-level digital lessons.
- D Review students with the highest average lessons, largest increase, lowest average lessons, and largest decrease in the selected time period.

7

Click on the metric **SY On/Above Grade Lessons per Student** to monitor progress on completing grade-level digital lessons across the school year.

- A Review the distribution of students completing school year lessons by on/above grade-level or total grade lessons towards the end of year goal of **90 grade-level lessons**.
- B Review students with the highest and lowest number of SY lessons in the selected time period.
