

Name _____

Date _____

Lena's family visits Little Tree Apple Orchard. Use the RDW process to solve the problems about Lena's visit to the orchard. Use a letter to represent the unknown in each problem.

1. The sign below shows information about hayrides at the orchard.

- a. Lena's family buys 2 adult tickets and 2 child tickets for the hayride. How much does it cost Lena's family to go on the hayride?
- b. Lena's mom pays for the tickets with \$5 bills. She receives \$3 in change. How many \$5 bills does Lena's mom use to pay for the hayride?
- c. Lena's family wants to go on the fourth hayride of the day. It's 11:38 now. How many minutes do they have to wait for the fourth hayride?

4. Kami scored a total of 21 points during her basketball game. She made 6 two-point shots, and the rest were three-point shots. How many three-point shots did Kami make?
5. An orange weighs 198 grams. A kiwi weighs 85 grams less than the orange. What is the total weight of the fruit?
6. The total amount of rain that fell in New York City in two years was 282 centimeters. In the first year, 185 centimeters of rain fell. How many more centimeters of rain fell in the first year than in the second year?

Name _____

Date _____

Use the RDW process to solve the problems below. Use a letter to represent the unknown in each problem. When you are finished, share your solutions with a partner. Discuss and compare your strategies with your partner's strategies.

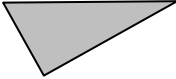

1. Monica measures 91 milliliters of water into 9 tiny beakers. She measures an equal amount of water into the first 8 beakers. She pours the remaining water into the ninth beaker. It measures 19 milliliters. How many milliliters of water are in each of the first 8 beakers?
2. Matthew and his dad put up 8 six-foot lengths of fence on Monday and 9 six-foot lengths on Tuesday. What is the total length of the fence?
3. The total weight of Laura's new pencils is 112 grams. One pencil rolls off the scale. Now the scale reads 105 grams. What is the total weight of 7 new pencils?

4. Mrs. Ford's math class starts at 8:15. They do 3 fluency activities that each last 4 minutes. Just when they finish all of the fluency activities, the fire alarm goes off. When they return to the room after the drill, it is 8:46. How many minutes did the fire drill last?
5. On Saturday, the baker bought a total of 150 pounds of flour in five-pound bags. By Tuesday, he had 115 pounds of flour left. How many five-pound bags of flour did the baker use?
6. Fred cut an 84-centimeter rope into 2 parts and gave his sister 1 part. Fred's part is 56 centimeters long. His sister cut her rope into 4 equal pieces. How long is 1 of his sister's pieces of rope?

Name _____

Date _____

1. Cut out all the polygons (A–L) in the Template. Then, use the polygons to complete the following chart.

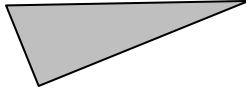

Attribute	Write the letters of the polygons in this group.	Sketch 1 polygon from the group.
<i>Example:</i> 3 Sides	Polygons: Y, Z	
4 Sides	Polygons:	
At Least 1 Set of Parallel Sides	Polygons:	
2 Sets of Parallel Sides	Polygons:	
4 Right Angles	Polygons:	
4 Right Angles and 4 Equal Sides	Polygons:	

2. Write the letters of the polygons that are quadrilaterals. Explain how you know these polygons are quadrilaterals.
3. Sketch a polygon below from the group that has 2 sets of parallel sides. Trace 1 pair of parallel sides red. Trace the other pair of parallel sides blue. What makes parallel sides different from sides that are not parallel?
4. Draw a diagonal line from one corner to the opposite corner of each polygon you drew in the chart using a straightedge. What new polygon(s) did you make by drawing the diagonal lines?

Name _____

Date _____

1. Cut out all the polygons (M–X) in the Template. Then, use the polygons to complete the following chart.

Attribute	List polygons' letters for each group.	Sketch 1 polygon from the group.
<i>Example:</i> 3 Sides	Polygons: Y, Z	
All Sides Are Equal	Polygons:	
All Sides Are Not Equal	Polygons:	
At Least 1 Right Angle	Polygons:	
At Least 1 Set of Parallel Sides	Polygons:	

2. Compare Polygon M and Polygon X. What is the same? What is different?
3. Jenny says, “Polygon N, Polygon R, and Polygon S are all regular quadrilaterals!” Is she correct? Why or why not?
4. “I have six equal sides and six equal angles. I have three sets of parallel lines. I have no right angles.”
- a. Write the letter and the name of the polygon described above.
- b. Estimate to draw the same type of polygon as in part (a), but with no equal sides.

4. Draw a pentagon with at least 2 equal sides. Label the 2 equal side lengths of your shape.
5. Draw a hexagon with at least 2 equal sides. Label the 2 equal side lengths of your shape.
6. Sam says that he drew a polygon with 2 sides and 2 angles. Can Sam be correct? Use pictures to help you explain your answer.

Name _____

Date _____

1. Use tetrominoes to create at least two different rectangles. Then, color the grid below to show how you created your rectangles. You may use the same tetromino more than once.

2. Use tetrominoes to create at least two squares, each with an area of 36 square units. Then, color the grid below to show how you created your squares. You may use the same tetromino more than once.

- a. Write an equation to show the area of a square above as the sum of the areas of the tetrominoes you used to make the square.

- b. Write an equation to show the area of a square above as the product of its side lengths.

3. a. Use tetrominoes to create at least two different rectangles, each with an area of 12 square units. Then, color the grid below to show how you created the rectangles. You may use the same tetromino more than once.

- b. Explain how you know the area of each rectangle is 12 square units.

4. Marco created a rectangle with tetrominoes and traced its outline in the space below. Use tetrominoes to re-create it. Estimate to draw lines inside the rectangle below to show how you re-created Marco's rectangle.

Name _____ Date _____

1. Fold and cut the square on the diagonal. Draw and label your 2 new shapes below.

2. Fold and cut one of the triangles in half. Draw and label your 2 new shapes below.

3. Fold twice, and cut your large triangle. Draw and label your 2 new shapes below.

4. Fold and cut your trapezoid in half. Draw and label your 2 new shapes below.

5. Fold and cut one of your trapezoids. Draw and label your 2 new shapes below.
6. Fold and cut your second trapezoid. Draw and label your 2 new shapes below.
7. Reconstruct the original square using the seven shapes.
- a. Draw lines inside the square below to show how the shapes go together to form the square. The first one has been done for you.

- b. Describe the process of forming the square. What was easy, and what was challenging?

- e. Which color represents the perimeters of the shapes? How do you know?
- f. What does the other color represent? How do you know?
- g. Which shape has a greater area? How do you know?
2. a. Outline the perimeter of the shapes below with a red crayon.

- b. Explain how you know you outlined the perimeters of the shapes above.
3. Outline the perimeter of this piece of paper with a highlighter.

Name _____

Date _____

1. Measure and label the side lengths of the shapes below in centimeters. Then, find the perimeter of each shape.

a.

Perimeter = _____ cm + _____ cm + _____ cm + _____ cm
 = _____ cm

b.

Perimeter = _____
 = _____ cm

c.

Perimeter = _____
 = _____ cm

d.

Perimeter = _____
 = _____ cm

e.

Perimeter = _____
 = _____ cm

2. Carson draws two triangles to create the new shape shown below. Use a ruler to find the side lengths of Carson's shape in centimeters. Then, find the perimeter.

3. Hugh and Daisy draw the shapes shown below. Measure and label the side lengths in centimeters. Whose shape has a greater perimeter? How do you know?

Hugh's Shape

Daisy's Shape

4. Andrea measures one side length of the square below and says she can find the perimeter with that measurement. Explain Andrea's thinking. Then, find the perimeter in centimeters.

Name _____

Date _____

1. Find the perimeter of the following shapes.

$$P = 3 \text{ in} + 8 \text{ in} + 3 \text{ in} + 8 \text{ in}$$

$$= \underline{\hspace{2cm}} \text{ in}$$

$$P = \underline{\hspace{1cm}} \text{ cm} + \underline{\hspace{1cm}} \text{ cm} + \underline{\hspace{1cm}} \text{ cm} + \underline{\hspace{1cm}} \text{ cm}$$

$$= \underline{\hspace{2cm}} \text{ cm}$$

$$P = \underline{\hspace{1cm}} \text{ cm} + \underline{\hspace{1cm}} \text{ cm} + \underline{\hspace{1cm}} \text{ cm}$$

$$= \underline{\hspace{2cm}} \text{ cm}$$

$$P = \underline{\hspace{1cm}} \text{ m} + \underline{\hspace{1cm}} \text{ m} + \underline{\hspace{1cm}} \text{ m} + \underline{\hspace{1cm}} \text{ m}$$

$$= \underline{\hspace{2cm}} \text{ m}$$

$$P = \underline{\hspace{1cm}} \text{ in} + \underline{\hspace{1cm}} \text{ in} + \underline{\hspace{1cm}} \text{ in} + \underline{\hspace{1cm}} \text{ in} + \underline{\hspace{1cm}} \text{ in}$$

$$= \underline{\hspace{2cm}} \text{ in}$$

2. Alan's rectangular swimming pool is 10 meters long and 16 meters wide. What is the perimeter?

3. Lila measures each side of the shape below.

- a. What is the perimeter of the shape?
- b. Lila says the shape is a pentagon. Is she correct? Explain why or why not.

Name _____

Date _____

1. Label the unknown side lengths of the regular shapes below. Then, find the perimeter of each shape.

a.

Perimeter = _____ in

b.

Perimeter = _____ ft

c.

Perimeter = _____ m

d.

Perimeter = _____ in

2. Label the unknown side lengths of the rectangle below. Then, find the perimeter of the rectangle.

Perimeter = _____ cm

3. David draws a regular octagon and labels a side length as shown below. Find the perimeter of David's octagon.

4. Paige paints an 8-inch by 9-inch picture for her mom's birthday. What is the total length of wood that Paige needs to make a frame for the picture?

5. Mr. Spooner draws a regular hexagon on the board. One of the sides measures 4 centimeters. Giles and Xander find the perimeter. Their work is shown below. Whose work is correct? Explain your answer.

Giles's Work

$$\text{Perimeter} = 4 \text{ cm} + 4 \text{ cm} + 4 \text{ cm} + 4 \text{ cm} + 4 \text{ cm} + 4 \text{ cm}$$

$$\text{Perimeter} = 24 \text{ cm}$$

Xander's Work

$$\text{Perimeter} = 6 \times 4 \text{ cm}$$

$$\text{Perimeter} = 24 \text{ cm}$$

4. Marion paints a 5-pointed star on her bedroom wall. Each side of the star is 18 inches long. What is the perimeter of the star?

5. The soccer team jogs around the outside of the soccer field twice to warm up. The rectangular field measures 60 yards by 100 yards. What is the total number of yards the team jogs?
6. Troop 516 makes 3 triangular flags to carry at a parade. They sew ribbon around the outside edges of the flags. The flags' side lengths each measure 24 inches. How many inches of ribbon does the troop use?

Name _____

Date _____

1. Find the perimeter of 10 circular objects to the nearest quarter inch using string. Record the name and perimeter of each object in the chart below.

Object	Perimeter (to the nearest quarter inch)

- a. Explain the steps you used to find the perimeter of the circular objects in the chart above.

- b. Could the same process be used to find the perimeter of the shape below? Why or why not?

2. Can you find the perimeter of the shape below using just your ruler? Explain your answer.

3. Molly says the perimeter of the shape below is $6\frac{1}{4}$ inches. Use your string to check her work. Do you agree with her? Why or why not?

4. Is the process you used to find the perimeter of a circular object an efficient method to find the perimeter of a rectangle? Why or why not?

Name _____

Date _____

1. The shapes below are made up of rectangles. Label the unknown side lengths. Then, write and solve an equation to find the perimeter of each shape.

P =

P =

P =

P =

2. Nathan draws and labels the square and rectangle below. Find the perimeter of the new shape.

3. Label the unknown side lengths. Then, find the perimeter of the shaded rectangle.

Name _____

Date _____

1. Use unit squares to build as many rectangles as you can with an area of 24 square units. Shade in squares on your grid paper to represent each rectangle that you made with an area of 24 square units.
 - a. Estimate to draw and label the side lengths of each rectangle you built in Problem 1. Then, find the perimeter of each rectangle. One rectangle is done for you.

$$P = 24 \text{ units} + 1 \text{ unit} + 24 \text{ units} + 1 \text{ unit} = \underline{50 \text{ units}}$$

- b. The areas of the rectangles in part (a) above are all the same. What do you notice about the perimeters?

2. Use unit square tiles to build as many rectangles as you can with an area of 16 square units. Estimate to draw each rectangle below. Label the side lengths.

a. Find the perimeters of the rectangles you built.

b. What is the perimeter of the square? Explain how you found your answer.

3. Doug uses square unit tiles to build rectangles with an area of 15 square units. He draws the rectangles as shown below but forgets to label the side lengths. Doug says that Rectangle A has a greater perimeter than Rectangle B. Do you agree? Why or why not?

Name _____

Date _____

1. Use unit square tiles to make rectangles for each given number of unit squares. Complete the charts to show how many rectangles you can make for each given number of unit squares. The first one is done for you. You might not use all the spaces in each chart.

Number of unit squares = 12	
Number of rectangles I made: <u>3</u>	
Width	Length
1	12
2	6
3	4

Number of unit squares = 13	
Number of rectangles I made: ____	
Width	Length

Number of unit squares = 14	
Number of rectangles I made: ____	
Width	Length

Number of unit squares = 15	
Number of rectangles I made: ____	
Width	Length

Number of unit squares = 16	
Number of rectangles I made: ____	
Width	Length

Number of unit squares = 17	
Number of rectangles I made: ____	
Width	Length

Number of unit squares = 18	
Number of rectangles I made: ____	
Width	Length

2. Create a line plot with the data you collected in Problem 1.

Number of Rectangles Made with Unit Squares

3. Which numbers of unit squares produce three rectangles?
4. Why do some numbers of unit squares, such as 13, only produce one rectangle?

Name _____

Date _____

1. Use your square unit tiles to build as many rectangles as you can with a perimeter of 12 units.

a. Estimate to draw your rectangles below. Label the side lengths of each rectangle.

b. Explain your strategy for finding rectangles with a perimeter of 12 units.

c. Find the areas of all the rectangles in part (a) above.

d. The perimeters of all the rectangles are the same. What do you notice about their areas?

3. Use centimeter grid paper to shade in as many rectangles as you can with the given perimeters.
- a. Use the charts below to show how many rectangles you shaded for each given perimeter. You might not use all the spaces in the charts.

Perimeter = 10 cm		
Number of rectangles I made: ____		
Width	Length	Area
1 cm	4 cm	4 square cm

Perimeter = 20 cm		
Number of rectangles I made: ____		
Width	Length	Area
1 cm	9 cm	9 square cm

- b. Did you make a square with either of the given perimeters? How do you know?
4. Macy and Gavin both draw rectangles with perimeters of 16 centimeters. Use words and pictures to explain how it is possible for Macy’s and Gavin’s rectangles to have the same perimeters but different areas.

Name _____

Date _____

1. Use the data you gathered from your Problem Sets to create a line plot for the number of rectangles you created with each given perimeter.

Number of Rectangles Made with a Given Perimeter

Perimeter Measurements in Units

X = 1 Rectangle

2. Why are all of the perimeter measurements even? Do all rectangles have an even perimeter?

4. Raj uses 6-inch square tiles to make a rectangle, as shown below. What is the perimeter of the rectangle in inches?

5. Mischa makes a 4-foot by 6-foot rectangular banner. She puts ribbon around the outside edges. The ribbon costs \$2 per foot. What is the total cost of the ribbon?
6. Colton buys a roll of wire fencing that is 120 yards long. He uses it to fence in his 18-yard by 24-yard rectangular garden. Will Colton have enough wire fencing left over to fence in a 6-yard by 8-yard rectangular play space for his pet rabbit?

Name _____

Date _____

Use the given perimeters in the chart below to choose the widths and lengths of your robot’s rectangular body parts. Write the widths and lengths in the chart below. Use the blank rows if you want to add extra rectangular body parts to your robot.

Letter	Body Part	Perimeter	Width and Length
A	arm	14 cm	_____ cm by _____ cm
B	arm	14 cm	_____ cm by _____ cm
C	leg	18 cm	_____ cm by _____ cm
D	leg	18 cm	_____ cm by _____ cm
E	body	Double the perimeter of one arm = _____ cm	_____ cm by _____ cm
F	head	16 cm	_____ cm by _____ cm
G	neck	Half the perimeter of the head = _____ cm	_____ cm by _____ cm
H			_____ cm by _____ cm
I			_____ cm by _____ cm
My robot has 7 to 9 rectangular body parts. Number of body parts: _____			

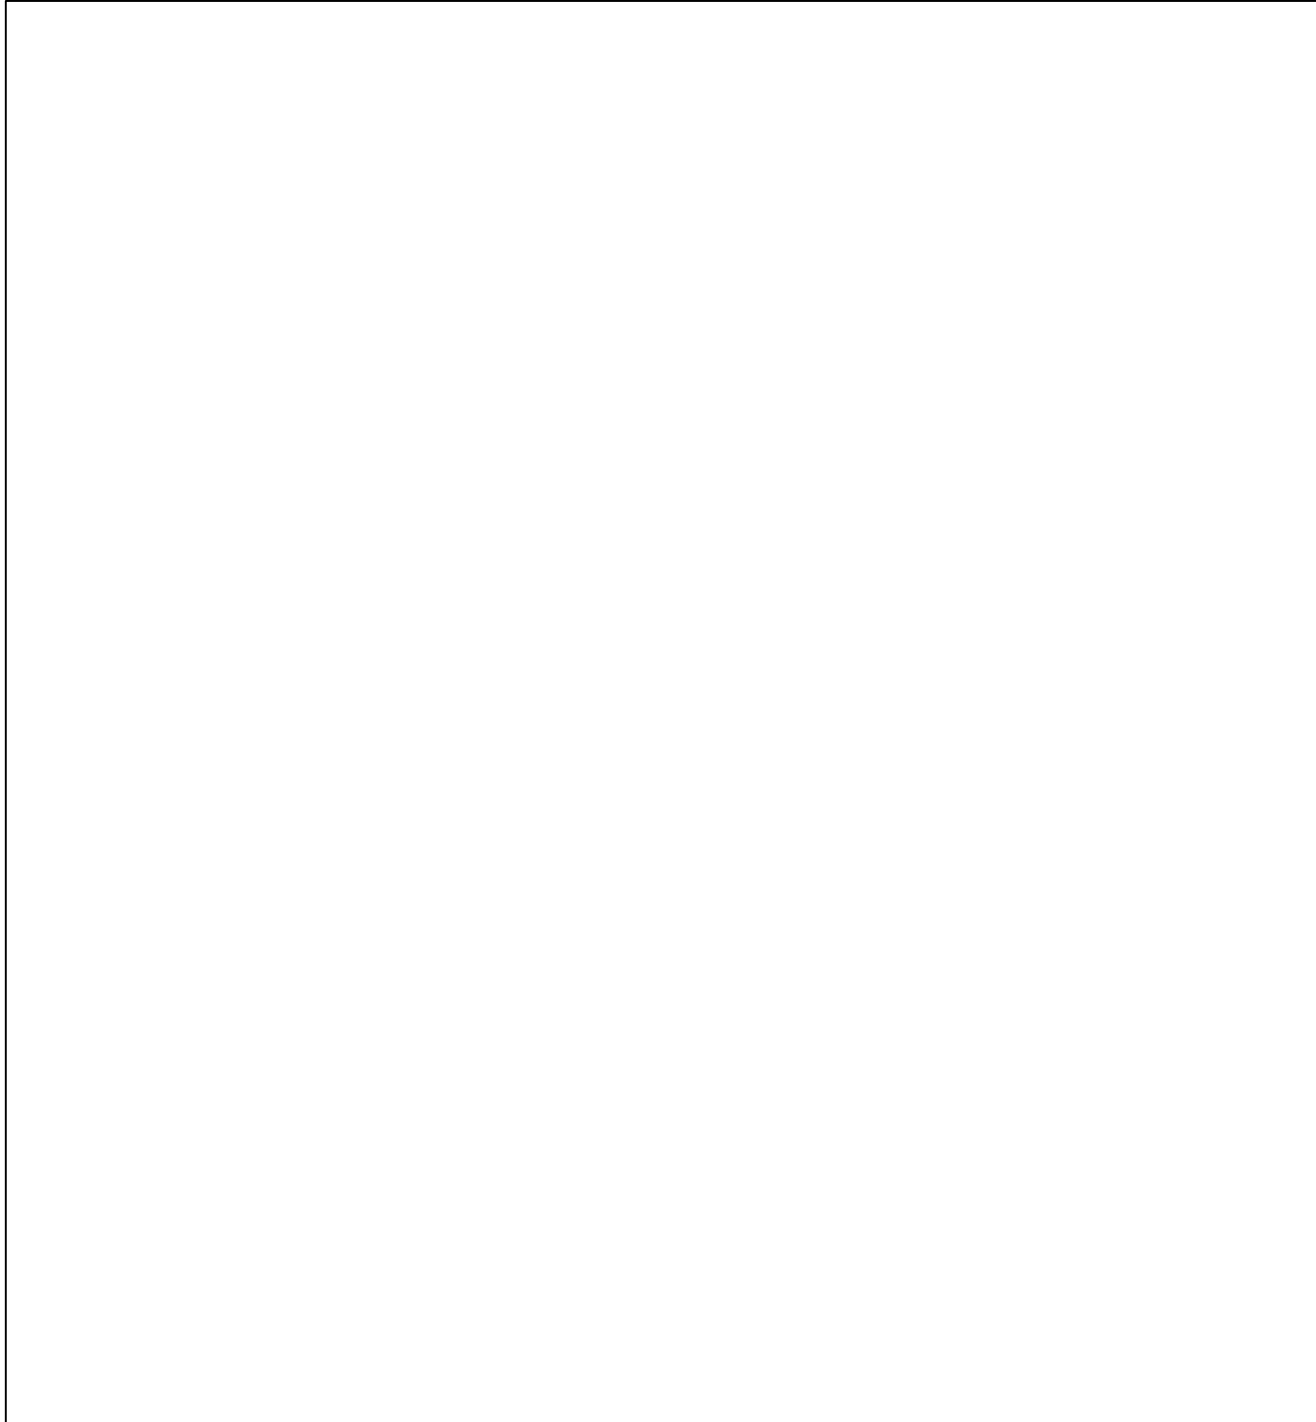

Use the information in the chart below to plan an environment for your robot. Write the width and length for each rectangular item. Use the blank rows if you want to add extra circular or rectangular items to your robot’s environment.

Letter	Item	Shape	Perimeter	Width and Length
J	sun	circle	about 25 cm	
K	house	rectangle	82 cm	_____ cm by _____ cm
L	tree top	circle	about 30 cm	
M	tree trunk	rectangle	30 cm	_____ cm by _____ cm
N	tree top	circle	about 20 cm	
O	tree trunk	rectangle	20 cm	_____ cm by _____ cm
P				
Q				
My robot’s environment has 6 to 8 items. Number of items: _____				

Name _____

Date _____

Draw a picture of your robot in its environment in the space below. Label the widths, lengths, and perimeters of all rectangles. Label the perimeters of all circular shapes.

Name _____

Date _____

1. Collect the area measurements of your classmates' **robot bodies**. Make a line plot using everyone's area measurements.

Areas of Robot Bodies

**Area Measurements of the Robot's Body in
Square Centimeters**

X = 1 Robot Body

- a. How many different measurements are on the line plot? Why are the measurements different?

- b. What does this tell you about the relationship between area and perimeter?

Name _____

Date _____

Part A: I reviewed _____'s robot.

- Use the chart below to evaluate your friend's robot. Measure the width and length of each rectangle. Then, calculate the perimeter. Record that information in the chart below. If your measurements differ from those listed on the project, put a star by the letter of the rectangle.

Rectangle	Width and Length	Student's Perimeter	Required Perimeter
A	_____ cm by _____ cm		14 cm
B	_____ cm by _____ cm		14 cm
C	_____ cm by _____ cm		18 cm
D	_____ cm by _____ cm		18 cm
E	_____ cm by _____ cm		28 cm
F	_____ cm by _____ cm		16 cm
G	_____ cm by _____ cm		8 cm
H	_____ cm by _____ cm		
I	_____ cm by _____ cm		

Part B: I reviewed _____’s robot environment.

4. Use the chart below to evaluate your friend’s robot environment. Measure the width and length of each rectangle. Then, calculate the perimeter. Use your string to measure the perimeters of nonrectangular items. Record that information in the chart below. If your measurements differ from those listed on the project, put a star by the letter of the shape.

Item	Width and Length	Student’s Perimeter	Required Perimeter
J			About 25 cm
K	_____ cm by _____ cm		82 cm
L			About 30 cm
M	_____ cm by _____ cm		30 cm
N			About 20 cm
O	_____ cm by _____ cm		20 cm
P			
Q			

Name _____

Date _____

1. Gia measures her rectangular garden and finds the width is 9 yards and the length is 7 yards.

a. Estimate to draw Gia's garden, and label the side lengths.

b. What is the area of Gia's garden?

c. What is the perimeter of Gia's garden?

2. Elijah draws a square that has side lengths of 8 centimeters.

a. Estimate to draw Elijah's square, and label the side lengths.

b. What is the area of Elijah's square?

c. What is the perimeter of Elijah's square?

- d. Elijah connects three of these squares to make one long rectangle. What is the perimeter of this rectangle?
3. The area of Mason's rectangular painting is 72 square inches. The width of the painting is 8 inches.
- a. Estimate to draw Mason's painting, and label the side lengths.
- b. What is the length of the painting?
- c. What is the perimeter of Mason's painting?
- d. Mason's mom hangs the painting on a wall that already has two of Mason's other paintings. The areas of the other paintings are 64 square inches and 81 square inches. What is the total area of the wall that is covered with Mason's paintings?

4. The perimeter of Jillian’s rectangular bedroom is 34 feet. The length of her bedroom is 9 feet.
- Estimate to draw Jillian’s bedroom, and label the side lengths.
 - What is the width of Jillian’s bedroom?
 - What is the area of Jillian’s bedroom?
 - Jillian has a 4-foot by 6-foot rug in her room. What is the area of the floor that is not covered by the rug?

Name _____

Date _____

1. Kyle puts two rectangles together to make the L-shaped figure below. He measures some of the side lengths and records them as shown.

- Find the perimeter of Kyle's shape.
- Find the area of Kyle's shape.
- Kyle makes two copies of the L-shaped figure to create the rectangle shown below. Find the perimeter of the rectangle.

2. Jeremiah and Hayley use a piece of rope to mark a square space for their booth at the science fair. The area of their space is 49 square feet. What is the length of the rope that Jeremiah and Hayley use if they leave a 3-foot opening so they can get in and out of the space?
3. Vivienne draws four identical rectangles as shown below to make a new, larger rectangle. The perimeter of one of the small rectangles is 18 centimeters, and the width is 6 centimeters. What is the perimeter of the new, larger rectangle?

4. A jogging path around the outside edges of a rectangular playground measures 48 yards by 52 yards. Maya runs $3\frac{1}{2}$ laps on the jogging path. What is the total number of yards Maya runs?

Use this form to analyze your classmate’s representations of one-half shaded.

Square (letter)	Does this square show one-half shaded?	Explain why or why not.	Describe changes to make so the square shows one-half shaded.

Name _____

Date _____

1. Look at the circles you shaded today. Glue a circle that is about one-half shaded in the space below.

a. Explain the strategy you used to shade in one-half of your circle.

b. Is your circle exactly one-half shaded? Explain your answer.

2. Julian shades 4 circles as shown below.

Circle A

Circle B

Circle C

Circle D

a. Write the letters of the circles that are about one-half shaded.

- b. Choose one circle from your answer to Part (a), and explain how you know it's about one-half shaded.

Circle _____

- c. Choose one circle that you did not list in Part (a), and explain how it could be changed so that it is about one-half shaded.

Circle _____

3. Read the clues to help you shade the circle below.

- Divide the circle into 4 equal parts.
- Shade in 2 parts.
- Erase a small circle from each shaded part.
- Estimate to draw and shade 2 circles in the unshaded parts that are the same size as the circles you erased in Part (c).

4. Did you shade in one-half of the circle in Problem 3? How do you know?
